

Thank You xCT+ Beta Tester!

I very much appreciate the help you are giving to me to get my add-on out to the public. I am writing this guide to help you get started exploring xCT+. If you feel up to it, feel free to jump right in! Otherwise I have a short FAQ I would like you to read. All questions, comments, requests and bug reports should be directed to this [thread](#). (**Requires** a free membership on www.tukui.org)

FAQ – Frequently Asked Questions

How do I get to xCT+ configuration tool?

Type “/xct”. Please remember that there are a few options still in [Game Menu --> Interface --> Floating Combat Text]. I will probably be moving all of those to the configuration tool.

Can I get my friend into the beta?

I want xCT+ to be in a ‘closed’ beta, but anyone can request to receive an invite. Have him/her obtain a username on www.tukui.org and send a private message to **Dandruff**. Obviously, you can just give them the beta yourself, but I would like to be able to push updates to all the testers.

I have a Lua error, should I report it?

All Lua errors should be reported without delay.

An option does not work as described, what do you want me to do?

I personally test most options before I release each version. You can go ahead and make a post on the forum if you feel that it is not a very obvious one (e.g. you don’t allow xCT+ to show “immunes” but it does it anyway in certain circumstances).

I can’t seem to find a feature, will you be adding it?

Maybe! Make a post, and I will see what I can do!

Will this Add-On have localization added?

Yes. I am not going to worry about it too much at this time, but I have been planning it at some point in time.

Does this Add-On employ any code from xCT or xCT+ version 2?

The short answer is no. It was heavily influenced by xCT, but 99% of the add-on has been rewritten from the ground up. Only the visual style has been ‘copied’.

When is xCT+ going to be released?

I have been shooting for the beginning of November, but I can’t make any promises at this time.

REQUESTING TO BE IN THE BETA WILL AUTOMATICALLY PLACE YOUR NAME IN THE CREDITS OF THIS ADD-ON. IF YOU DO NOT WANT YOUR NAME THERE, SEND ME A MESSAGE AND I CAN IMMEDIATELY REMOVE IT.
